

The Honorable Alan Wilson
P.O. Box 11549
Columbia, S.C. 29211

October 21, 2024

Dear AG Wilson,

Please find enclosed copies of two (2) Resolutions that the Myrtle Beach Republican Women (MBRW) recently adopted. The originals have been sent to Governor Henry McMaster. Individual MBRW members will also be sending copies to their legislators.

The Resolutions are strong statements that send a message of what we expect as citizens of South Carolina in the name of justice and protection of the people of this great state.

The first Resolution—**Resolution to Ban Covid-19 and mRNA Injections in South Carolina**—illuminates a subject that has received no attention by elected officials in this state, although we know you have been approached on more than one occasion with solid evidence that the injections are military countermeasures and bioweapons, causing immense suffering and death. You have even been presented with the opportunity to pull the injections based on violations of consumer protection statutes. And yet, nothing has been done. Please read the Resolution and research the sources cited.

The second Resolution—**Resolution to Oppose the United Nations, the World Health Organization, and the World Economic Forum**—acknowledges that you and Governor McMaster have signed petitions and letters opposing publicized plans of the WHO and the UN. However, there are many concrete solutions to protect South Carolinians against federal and multinational overreach that must be implemented.

These are just two of the many critical issues impacting your constituents that we feel passionate enough about to educate ourselves and to appeal to you. We urge you to take the time to review the enclosed information and to take bold action. We thank you for your care and attention.

Best regards,

Heather Teichmann
